Welcome Message

Welcome to the twenty-seventh edition of the Workshop on Requirements Engineering-WER2024.

The workshop will occur on August 7, 8, and 9, 2024, at the University of Belgrano in Buenos Aires, Argentina. The event is organized by the Universidad Nacional del Oeste (UNO), the Universidad Abierta Interamericana (UAI), the Universidad Nacional de La Plata (UNLP) and the University of Belgrano. The event brings together participants from academia and industry for three days of engaging and productive debates. Key themes include usability, transparency, data protection, natural language processing, accessibility, sustainability, technical debt, and security requirements.

WER 2025 initially received 48 abstracts. Out of these, 33 were submitted as regular papers; these submissions came from 9 different countries, such as Argentina, Brazil, Colombia, Ecuador, Germany, Italy, Netherlands, Peru, Portugal. After a rigorous review process, each submitted paper was evaluated by a minimum of three program committee members. Finally, 19 articles were selected for publication as full papers, their authors were from different Brazilian states, as well as from Argentina, Ecuador and Italy.

This edition comprises seven tracks, including a Research Track (RT), Industry Track (IT), Master and Doctorate Track (MDT), Software Requirements Tools Track (SRTT), Journal First Track (JFT), and a new Student Poster Track (ST). Additionally, there are three Keynote Speakers: Fabiano Dalplaz from Utrecht University (international speaker), Alejandro Oliveros from the National University of Tres de Febrero (local speaker), and industry speaker Jorge Ceballos. Finally, two tutorials will be offered: "Natural Language Processing for Requirements Management" and "Requirements Elicitation based on Design Thinking."

We would like to express our gratitude to the international committee of the program, which consists of members from various countries, for their contributions to improving the quality of the articles. We also want to thank the authors for their valuable submissions, as well as the track chairs, session chairs, keynote speakers, proceedings chairs, publicity chairs, and tutorial instructors for their hard work. Special thanks to General Chair Graciela Hadad, local organization chairs Leandro Antonelli and Paula Angeleri, and all the members of the time who made the workshop possible. Thanks to the WER Steering Committee, including Graciela Hadad, Jaelson Castro, and Julio Leite, for their continuous efforts in promoting this event and ensuring its quality and advancement. Lastly, we extend our appreciation to the participants for their interest in the Requirements Engineering topics promoted by this workshop.

Tutorial

Uso de Natural Language Processing y Machine Learning para la Gestión de Requerimientos

Juliana Delle Ville, Giuliana Maltempo, Roxana Portugal, Leandro Antonelli

Abstract: La ingeniería de requerimientos es una de las etapas más críticas del desarrollo de software. Si bien existen desarrollos bajo métodos ágiles en donde las prácticas de requerimientos son mínimas, aún existen muchos desarrollos tradicionales en donde se invierte mucho esfuerzo en requerimientos. En particular, el lenguaje natural es el instrumento más utilizado, puesto que ayuda a reducir la brecha comunicacional que existe entre los clientes y el equipo de desarrollo. Sin embargo, el lenguaje natural puede originar varios defectos: ambigüedad, vaguedad, etc. En últimos años dos disciplinas de la inteligencia artificial han contribuido con muchas herramientas que han revolucionado el tratamiento de texto: natural language processing y machine learning. Este tutorial tiene por objetivo brindar las herramientas básicas para aplicar en la ingeniería de requerimientos.

Poniendo en práctica PRO-RE-DT, un Proceso de Elicitación de Requisitos Basado en Design Thinking

Ezequiel Kahan, Marcela Genero, Alejandro Oliveros

Abstract: La siguiente es una propuesta de un tutorial en el cual se aborda el rol de la elicitation de requisitos de software, algunos de sus desafíos, y los aportes que el enfoque de Design Thinking puede hacer a los mismos. Se presentará PRO-RE-DT, un proceso de elicitation de requisitos basado en Design Thinking a través de ejemplos y ejercicios prácticos a desarrollar por los participantes.
